

Ukraine's War of Survival Summary

04/29/2024 by Mark Taylor

Territorial Battle For possession slow with approx 20% of Ukraine Occupied. Ukraine may pursue the economic collapse of Russia, and a walk-away home of RuAF like when the USSR collapsed, is a viable and proven strategy that can work again.

Viability of Ukraine as a functioning state saved by holding Odessa. Ability to trade via Black Sea via destroying Russian Navy. Joining EU can massively help, and perhaps smooth path to NATO membership: WHICH MAY HELP WIN THE PEACE EVENTUALLY MUCH LIKE WEST GERMANY DID.

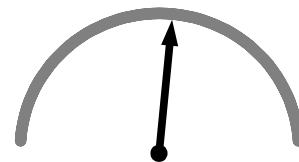

The Deep Battle to destroy and disrupt Russian Infrastructure, Arms, Fuel, Refineries, Power Grid Transformers, and Logistics (Locomotives) via SBU / HUR Direct Action inside Russia proper and occupied territories.

Battles of Attrition of Russian equipment as #1 priority, economy #2, personnel #3, plus morale follows these and is important because it might unseat Putin / end the war. Winning on attrition may render Russia unable to continue and eventually cause collapse.

TRUTH OF 400+ Baptists, Protestant, and Catholic churches bombed by Russia, set-back Russian "Disinformation-War". Danger persists of Trump posing risk of full-blown Putin support. Trump backed down for now on Ukraine aid over risk of alienating a big part of his base by Russian attacks on Christians and their churches in Ukraine...

Supply of Arms and Munitions Delayed by Trump influence over MAGA faction of Republicans: left Ukraine on the defensive, trying to contain the damage caused by Trump's delay tactics.
